## TRANSLITERATION GUIDELINES

The transliteration guidelines used in the writing of this book are the result of the ruling by the Minister of Religion of the Republic of Indonesia No. 158 year 1987 and Minister of Education and Culture of the Republic of Indonesia No. 0543b/U/1987. The transliteration is used to write Arabic words which are deemed to have not been absorbed into the Indonesian language. Arabic words that have been absorbed into the Indonesian language as shown in the linguistics dictionary or the Bahasa Indonesia dictionary (KBBI). Broadly, the guidelines of the transliteration are as follows.

1. A consonant Fonem-Arabic consonant fonem in Arabic writing system denoted by letter. In this transliteration it is partly denoted by letters, partly denoted by a sign, and partly symbolized by letters and signs at once. Below is a list of Arabic letters and transliteration with Latin alphabet.

Arabic Letters	Name	Alphabet Name	Description
ا	Alif	Not symbolized	Not symbolized
ب	Ba	B	Be
ت	Ta	T	Te
س	Sa	š	Es (With the point below)
ج	Jim	J	Je
ه	Ha	ḥ	ha (with the point below)

خ	Kha	Kh	Ka and Ha
د	Dal	D	De
ز	Zal	Z	zet (with the point below)
ر	Ra	R	Er
ز	Zai	Z	Zet
س	Sin	S	Es
ش	Syin	Sy	Es and ye
ص	Sad	§	es (with the point below)
ض	Dad	D	de (with the point below)
ط	Ta	ṭ	te (with the point below)
ظ	Za	ẓ	zet (with the point below)
ع	‘ain	,	Inverted comma
غ	Ghain	G	Ge
ف	Fa	F	Ef
ق	Qaf	Q	Qi
ك	Kaf	K	Ka
ل	Lam	L	El

م	Mim	M	Em
ن	Nun	N	En
و	Wau	W	We
ه	Ha	H	Ha
ء	Hamzah	,	Apostrophe
ي	Ya	Y	Ye

## 2. Vowel

Single vowel	Double vowel	Long vowel
í = a		í = ā
í = i	أَيْ = ai	إِيْ = ī
í = u	أُو = au	أُو = ū

## 3. Ta Marbutah

Ta marbutah is symbolized with /t/

Example:

مرأة جميلة is written Mar'atun Jamīlah

Ta marbutah is denoted with/h/example:

فاطمة is written Fātimah

## 4. Syaddad (Tasydid, gemination) The gemination mark is denoted by the same letter as the letter marked by the Syaddad.

Example:

ربنا is written rabbanā

البر is written al-Barr

5. The word password (article) the password followed by the "Syamsiyah letter" is narrated according to the sound, i.e. the/I/is replaced with the same letter as the letter directly following the word.

Example:

الشمس	is written	ash-syamsu
-------	------------	------------

الرجل	is written	ar-Rojulu
-------	------------	-----------

السيدة	is written	as-Sayyidinah
--------	------------	---------------

6. Article is followed by the "Qomariyah letter" with the sound, i.e./I/, it is changed with the same word.

Example:

القمر	is written	al-Qamar
-------	------------	----------

البديع	is written	al-Badi '
--------	------------	-----------

الجلان	is written	al-Jalāl
--------	------------	----------

7. Hamzah

Hamzah in the beginning of the word is not transliterated. However, if the Hamzah is in the middle of the word or at the end of the word, the illiterates Hamzah is transliterated with an apostrophe/'.

Example:

أمِرَث	is written	Umirtu
--------	------------	--------

شَيْءٌ	is written	syai'un
--------	------------	---------

## PERSEMBAHAN

Skripsi ini saya persembahkan kepada:

1. Ayahanda dan Ibunda tercinta (Bapak Casba'i dan Ibu Castumi) yang selalu bekerja keras tanpa mengenal lelah untuk mendukung saya dari SD hingga menjadi sarjana. Terimakasih atas segala kasih sayang, cinta dan do'a Bapak dan Ibu yang selalu mengiringi setiap langkahku, selalu memberi dukungan penuh dalam setiap perjalanan meraih cita-cita.
2. Keluargaku tersayang yang selalu mendukung dan selalu menemani serta memberikan semangat bagi saya.
3. Dosen pembimbing, dosen pengajar, serta semua pihak yang telah berkenan mendidikku, semoga amal baik yang diberikan dapat dibalas dengan berlipat ganda oleh Allah SWT. Khususnya bapak Khoirul Fikri yang selalu membimbing saya dan selalu memberikan pesan moral terhadap saya.
4. Elok karerina yang selalu setia dan saling mendukung, menyemangati serta menjadi partner diskusi yang selalu bisa diandalkan dalam proses penyusunan skripsi hingga selesai.
5. Sahabat-sahabat dan teman-temanku zaenal, fahmi, fauzi, nela, nanda, nila, rizal, rifki, dan ari yang selalu mengajarkan makna sebuah kebersamaan dan menjadi rumah kedua. Semoga Allah mempererat tali persaudaraan kita dan menjadikan kita manusia yang sukses dunia dan akhirat.
6. Teman-teman UKM-F Dycres 2018 dan 2019 yang telah menemani berproses menjadi manusia yang lebih baik lagi dan telah sama-sama belajar

bagaimana menjadi manusia yang lebih peka terhadap fenomena sekitar dan berguna bagi lingkungan sekitar.

7. Teman-teman seperjuangan jurusan Ekonomi Syariah Fakultas Ekonomi dan Bisnis Islam angkatan 2016 IAIN Pekalongan, semoga kita sukses selalu.

## ABSTRACT

Poverty is a multidimensional problem because the phenomenon has implications for various fields, such as social, economics, politics, and other sectors. In Pemalang, poverty is still relatively high, this is indicated by Musyawarah Perencanaan Pembangunan Daerah (Musrenbang) which categorized Pemalang as 14 poorest regency in Central Java. Some efforts are done to solve poverty in Pemalang. This Research aims to analyze partial and simultaneous effect of industrial growth, gross domestic regional product, and inflation on poverty level in Pemalang from 2010 to 2018.

This research is quantitative research by secondary data which is obtained from Central Bureau of Statistics of Pemalang and some journals as supporting data. This data is time series which is taken from 2010 to 2018. Data analysis methods uses linear regression analysis by using software *EVIEWS 9*.

The result of research shows that partially, industrial growth variable does not significantly effect on poverty level, gross domestic regional product significantly effect on poverty level, and inflation does not significantly effect on poverty level. While simultaneously, industrial growth, gross domestic regional product, and inflation significantly effect on poverty level.

**Keyword:** *Poverty, industrial growth, gross domestic regional product, inflation.*

## ACKNOWLEDGMENT

All praises be unto Allah Almighty who gives us salvation and blessing in life. Sholawat and Salam to our beloved Prophet Muhammad SAW.

This thesis entitled “Analysis of The Effect of Industrial Growth, Gross Domestic Regional Product, and Inflation on Poverty Level in Pemalang (2010-2018)” is written to submit one of requirements in accomplishing undergraduate degree (S-1) at Syariah Economics Department, Economics and Islamic Business Faculty, IAIN Pekalongan.

In arranging this thesis, the researcher gets a lot of guidances, supports, and advices from some special people until this thesis can be completely finished. In this precious chance, the researcher dedicates the special regards to:

1. Dr. H. Ade Dedi Rohayana, M.Ag as The Rector of IAIN Pekalongan
2. Dr. Hj. Shinta Dewi Rismawati, SH., M.H as The Dean of Economics and Islamic Business Faculty
3. Muhammad Aris Safi'i, M.E.I as the chief of Syaria Economics Department
4. Hj. Rinda Asytuti, M.Si as the advisor who guide me patiently. Thank you for valuable advice and guidance
5. My Endless Love, My Mom and My Dad (Nasikhah and Sukisno) who give me immeasurable love and affection.
6. My teachers and Kyai who always give me guidance in my life
7. The All Lecturers of Islamic Business and Economics Faculty who teach me patiently

8. My beloved family, Fatkhunnisa' and Mirza Ulfah as the sisters, and my funny nieces Ula, Ufa who always cheer me up
9. HMI Komisariat Walisongo as the place to learn about maturity.
10. SEMA FEBI as the place to learn about law and advocation
11. Keluarga Nusantara, KKN 3T Desa Bipolo (Amanca, Audry, Dilla, Rahman, Shofiq, Suryo, Yusril) as the selected people that inspire me
12. Grombyang Squad (Erma, Fika, Laras, Nita, Ari, Akmal, Aji, Reza), Ganjil Genap Squad (Ayu, Bagus, Fauzi, Fahmi, Zaenal, Fifi, Misbah, Didin, Ita), Mie Nyemek Squad (Faula, Tahta, Fera, Siska, Fauzi, Fahmi, Ridwan, Riskon, Sani), LKTI Squad (Septi dan Minkha), rekan JES Nasional (Ayu Ariska)
13. Mentor of managing data mbak Lenny dan Faqih, and
14. The All Colleagues.

## CHAPTER I

### PRELIMINARY

#### A. Background

Poverty is a multidimensional problem because the phenomenon has implications for various fields, such as: social, economics, politics, and other sectors. Based on World Bank, poverty is caused by lack of income and assets to fulfill basic needs. This condition of incompetence is characterized by the low ability of income to fulfill basic needs in the form of food, clothing and shelter. Low income capacity will result in a decrease in average living standards, such as health and education standards. In other sides, Poverty is related to labor absorption level, they who don't have job, automatically it does not have income source to fill their needs. So, poverty can be categorized as crucial problems because it will be impacted to the some aspects.

For Indonesia, poverty has long been a problem for the nation, where until now it still has not shown signs that it will end. Based on the results of the BPS, Indonesia's population living below the poverty line in 2019 is still quite large that is, around 9.41 percent. The condition of the community living in poverty confines generally suffer from malnutrition, poor health, high illiteracy rates, poor environment and lack of adequate access to infrastructure and public services. Beside it, that's condition

affects investor interest to invest in Indonesia, because some possible worries will be faced by investors, like: economic, social, politics instability becoming investment in Indonesia high risk. Based on the data

Economic strengthening is one of government efforts to reduce poverty level by expansion of employment opportunities that are expected labor absorption level, which has implications for increasing people income. It can realize good economic, politic, and other aspects conditions by strengthening economic. In the provincial context, according to work plan of BAPPEDA Central Java (2018). Strategy which is carried out by Government of Central Java, such as: building of Rumah Sehat Layak Huni (RSLH), electricity for poor people, social insurance for non-productive poor. Evolving basic needs sector to alleviate poverty by focussing capital sector, training for young entrepreneur, and apprenticeship of prospective workers. Furthermore, there will be institutional strengthening, such as: task force of poverty alleviation to support community which assisting poor people on ongoing basis.

Poverty alleviation that is based on the role of active and productivity of the people is strived to be independence of poor people. The people is trusted to formulate their based needs.<sup>1</sup> it means the people have to solve their problems independently by their efforts.

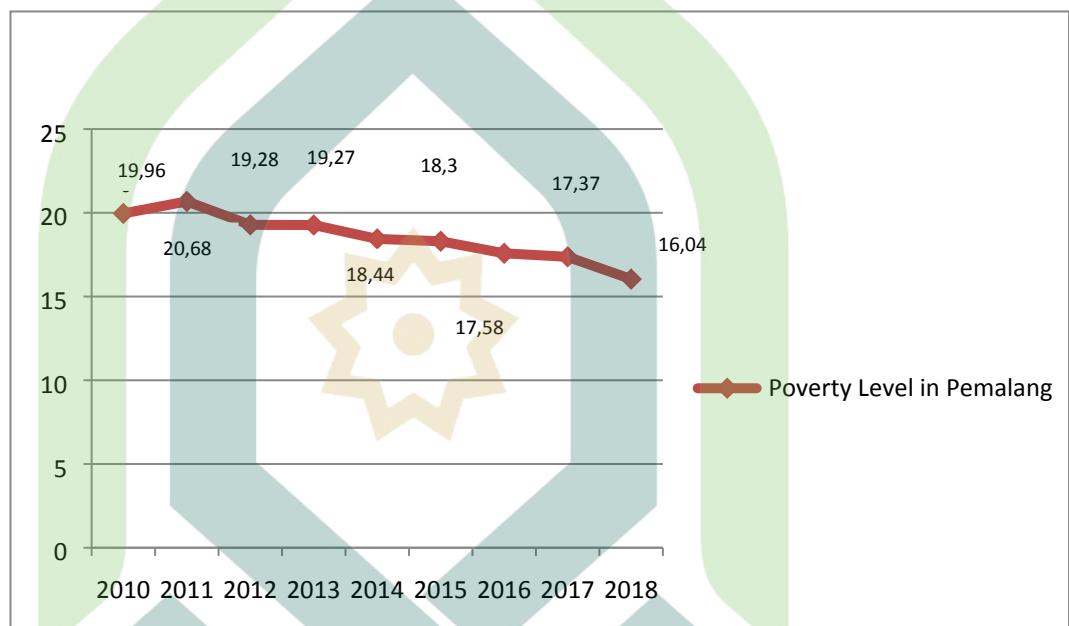

---

<sup>1</sup> Soeradji Budi dan Mubyarto, *Gerakan Penanggulangan Kemiskinan Laporan Penelitian Daerah-daerah*, (Yogyakarta: Aditya Media, 1998), page. 1

Poverty is still a problem in various regions in Indonesia, one of which is Pemalang District, poverty that occurs in Pemalang Regency is still relatively high, this is indicated by data taken from the Central Bureau of Statistics of Pemalang Regency.

Table 1.1.  
The Percentage of Poverty in Pemalang

Source: Statistic of Pemalang Regency (managed)

It can be looked at diagram of poverty level increasing and decreasing year to year. It shows poverty level in Pemalang is so fluctutive. But the ability to reduce poverty decreases. That is, the difference in poverty reduction is getting smaller from year to year. Institute for Development of Economic and Finance (INDEF) said, the capacity to reduce poverty is named *The Last Mile of Poverty Reduction*.

In other sides, poverty is closely related to joblessness, because one of the indications someone that can be called as poor man, if they cannot fill

their basic needs. In an effort to meet their basic needs requires money, and if the people don't have income source then they can not fill their basic needs. Employment expansion by increasing industrial sector becomes problem solving of high joblessness level that is implicated poverty. In Pemalang, based on Central Bureau of Statistic (BPS) the labor absorption level is seen the age above 15 years in 2018 amounted to 38.613 from the population age above 15 years 955.958 or 6,21%, it increased from 2017 amounted to 5,59%.

Strengthening income sector in a regional can be instrument to increase people prosperity level. Gross Domestic Regional Product (GDRP) is the number of commodity and services which is resulted in every unit production in domestic scale in a year. Gross Domestic Regional Product can be benchmark of government success in efforts to increase prosperity level. If the economic growth is so high, production of goods and services increases, so employment opportunity also increases and the joblessness level will decrease, it is possible standard of life increase.

Poverty is a collective enemy of the nation, not only an enemy of several individuals or groups. Fighting poverty is one of the targets of sustainable development goals (SDGs) that must be achieved, for the good of the nation. Some targets in alleviating poverty, among others: Ensure that all residents, especially the poor and vulnerable, have equal rights to access economic resources (such as basic service rights), ownership and access to land. Make sure they get technology access. Building needed and financial

services including microfinance. The resilience and readiness of the poor and vulnerable groups to deal with climate change, environmental, economic, social and disaster crises. Ensure significant mobilization of resources from various sources, including through expanded development cooperation, in order to provide sufficient and predictable tools for developing countries, especially less developed countries, to implement programs and policies that can end poverty in all its dimensions. Create a policy framework at the national, regional and international levels, based on development strategies that favor the poor and are gender sensitive, to accelerate investment in poverty alleviation actions.

There are some researches which discuss about poverty, by dependent variable which affects poverty, and every research has result each other. The research that is done by Fitri Amalia using education, unemployment, and inflation as dependent variable. Simultaneously, education, unemployment, and inflation do not effect significantly by the score of signification is more than 0,05. Partially, unemployment and inflation have negative effects but education has positive signification on poverty level because education has the score of probability 0,048 is more than error rate 5%. So, it can be said if education has significant effects on poverty level.<sup>2</sup>

---

<sup>2</sup> Fitri Amalia, *Pengaruh Pendidikan, Pengangguran, Dan Inflasi Terhadap Tingkat Kemiskinan Di Kawasan Timur Indonesia Periode 2001-2010*, (Jakarta: Jurnal Riset Ekonomi Universitas Negeri Jakarta, vol. X(2), 2012), Page. 165

Based on the some researches, the effect of industrial growth, gross domestic regional product, and inflation on poverty level is different in every research. Therefore, it is necessary to know the effect of industrial growth, gross domestic regional product, and inflation on poverty level in Pemalang. In this study, researchers will take the title "**Analysis Of The Effect Of Industrial Growth, GDRP, and Inflation on Poverty Levels In Pemalang Period 2010-2018**".

#### B. Research Question

1. Does the industrial growth effect poverty level in Pemalang ?
2. Does the Gross Domestic Regional Product effect poverty level in Pemalang ?
3. Does the inflation rate effect poverty level in Pemalang ?
4. Do industrial growth, Gross Domestic Regional Product, and Inflation effect simultaneously on poverty level ?

#### C. Research Purposes

1. To know the effect of industrial growth on poverty level in Pemalang
2. To know the effect of Gross Domestic Regional Product on poverty level in Pemalang
3. To know the effect of inflation on poverty level in Pemalang
4. To know industrial growth, gross domestic regional product, and inflation simultaneously effect on poverty level in Pemalang

#### D. Research uses

The result of this research is expected to provide the benefits:

1. Giving information about the effect of industrial growth, gross domestic regional product, and inflation on poverty level in Pemalang
2. To contribute into government of Pemalang by this research
3. To broaden scientific insights especially about industrial growth, gross domestic regional product, inflation, and poverty.

#### **E. Writing Systematics**

Writing in this research is arranged in some chapters, in every chapter will contain sub-chapters in accordance to need of study that will be done by writing systematics:

Chapter 1

##### : PRELIMINARY

This chapter divides to some chapters, background, research question, research purposes, research uses, and writing systematics.

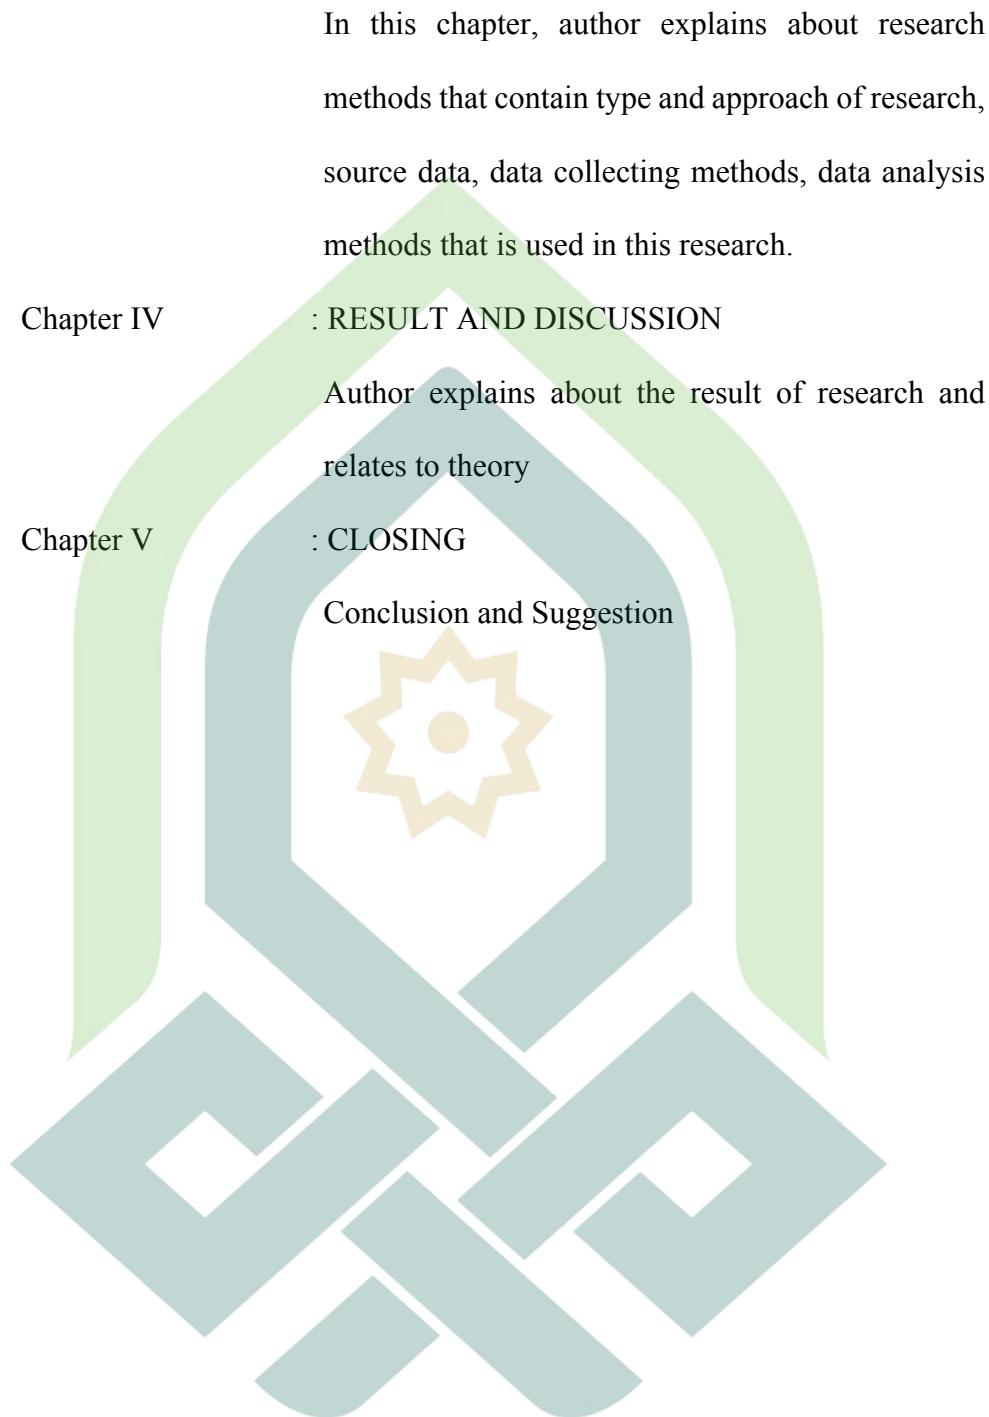

Chapter II

##### : LITERATURE REVIEW

In this chapter, author will elaborate about theoretical basis that related to research topic and the result of research which can be used as literature in accordance to topics of thesis. Besides, it will be explained about mind framework between independent variable and dependent variable which will be observed and hypothesis becomes reference in data analysis.

Chapter III

##### : RESEARCH METHODS

## CHAPTER V

### CLOSING

#### A. Conclusion

Based on the result of data analysis and discussion which have been explained in the previous chapter. It can be concluded:

1. Based on T-test, it is obtained the value of Prob. of industrial growth is 0.4223 which is more than alpha level 0,05 ( $0,4223 > 0,05$ ). Then, industrial growth (IND) does not significantly effect on poverty level. Therefore,  $H_0$  is accepted and  $H_a$  is rejected.
2. Based on T-test, it is obtained the value of Prob. of gross domestic regional product (GDRP) is 0.0150 which is fewer than alpha level 0,05 ( $0,0150 < 0,05$ ). Partially, gross domestic regional product significantly effects on poverty level. Therefore,  $H_0$  is rejected and  $H_a$  is accepted.
3. Based on T-test, it is obtained the value of Prob. of inflaion (INF) is 0.9605 which is more than alpha level 0,05 ( $0,9605 > 0,05$ ). Partially , inflation does not significantly effect on poverty level. Therefore,  $H_0$  is accepted and  $H_a$  is rejected.
4. According to F-test, it is obtained the value of Prob (F-Statistic) of 0,009267, the value is fewer than alpha level ( $0,009267 < 0,05$ ). Thus,  $H_0$  is rejected and  $H_a$  is accepted. Simultaneously, Industrial Growth,

5. Gross Domestic Regional Product, and Inflation significantly effect on poverty level.

#### B. Suggestions

1. To government of Pemalang,

In macro scale, it is expected the government of Pemalang to encourage economic growth, maintain investor confidence, increase labor absorption, and maximize natural source. In micro scale, it is expected the goverment of Pemalang to ease capital access for Small and Medium Enterprise.

2. To the next researcher, it can be expected to research more by using other variables and more data.
